16.00-18.00 CEST

Smart Health Age Friendly Environments: an opportunity to achieve a triple win through a collaborative and intedisciplinary approach. Sharing lessons with NET4Age-Friendly network

The societal challenges we have been facing since many years, such as population ageing, have been further comlpicated by the COVID-19 pandemic, that has been teaching us there is no trade-off between lives and livelihoods. Public health and the global economy are inextricably linked, and innovation plays a key-role as enabler of novel approaches to improve health outcomes and sustainability.

Stronger health information systems and support for a digital transformation of health systems can translate into a long term return on the well-being of people and the functioning of economies and societies, provided that interdisciplinary and multi-stakeholders collaborations are fostered.

Net4Age-Friendly network plays a key role in building valuable synergies between different knowledge fields towards establishing new local and regional ecosystems or to promote the growth of existing ones in each European country involved, working in health and well-being towards an age-friendly digital world.

Aim of this workshop is to share SHAFE concepts with Federico II University Hospital composite community of multidisciplinary stakeholders, thus fostering their engagement in collaborative activities.

16.00 Welcome and introduction. Anna Iervolino & Maria Triassi

Moderator: Maddalena Illario

16.10 SHAFE concept: key elements and opportunities for impact. Carina Dantas.

16.20 Net4Age-Friendly Community: an overview. Willeke Van Stuudien.

16.30 From urban districts to eco-districts: new approaches to improve the impact of the built environment on health. Mario Losasso

16.40 Implementing an innovative, community-based, one-health approach for lifecourse active ageing. Annamaria Colao, Federico II Unesco Chair on the Promotion of Population Health

16.50-17.45 Round table: enabling factors to build local ecosystems

Moderators: Guido Iaccarino & Lorenzo Mercurio

Building local ecosystems for innovation: the case of quadruple helix Reference Sites for active and healthy ageing. Maddalena Illario

Implementing the digital transformation of health and care: enabling role of national networks. Nicola Scomparin, ProMIS.

Addressing the challenges for technology-driven services: from organization to education and training. Silvia Rossi

Psycho-physic paradigms in health: the case for Psoriasis, stress and environment. Gabriella Fabbrocini.

Q&A open time

17.45 Conclusions & final remarks

Guido Iaccarino & Lorenzo Mercurio
